

THE EDGEFIELD ADVERTISER

IS PUBLISHED EVERY WEDNESDAY BY
W. F. DUBOIS & SON, Proprietors.

TWO DOLLARS per year, in advance—Two Dollars and Fifty Cents if not paid within six months and Three Dollars if not paid before the expiration of the year. All subscriptions not limited at the time of subscribing, will be considered as made for an indefinite period, and will be continued until all arrears are paid, or at the option of the Publisher. Subscriptions from other States must invariably be accompanied with the cash or reference to some known line.

Advertisements will be conspicuously inserted at 75 cents per square (12 lines or less) for the first insertion, and 37½ cents for each subsequent insertion. When only published Monthly or Quarterly, per square will be charged. All advertisements not having the desired number of insertions marked on the margin, will be continued until further and charged accordingly.

Those desiring to advertise by the year can do so on liberal terms—it being distinctly understood that contracts for yearly advertising are confined to the immediate legitimate business of the advertiser, and that no transient advertisements will be paid for in advance.

For announcing a Candidate, Three Dollars, in advance. For Advertising Extraordinary, Two Dollars, to be paid by the Magistrate advertising.

From the Correspondent of the N. Y. Herald.

WASHINGTON, April 9, 1855.

The President really has determined to make a demonstration against Spain at last. The selection of Commodore McCauley to command the Gulf Squadron is significant, and the rumors of an increase of the squadron, which I gave you some time since, are all confirmed. As strong a naval force as can be spared for the purpose has been ordered to cruise in the neighborhood of Cuba, in the track of our steamers, and future insults to our flag seem likely to be promptly redressed.

Captain General Concha is much frightened about the El Dorado affair, and makes all the excuses in his power. The President has taken very decided ground in that matter, and assumed the responsibility of carrying out his own views of the measures proper to be adopted. These, you may rest assured, are vigorous and extreme.

It seems that not only the El Dorado and the Daniel Webster have been brought to on the high seas by Spanish cruisers within the last month or two, but the Illinois also was served the same way not long ago. She did not report the fact, however—such outrages, without atonement, having become too common to be deemed in the estimation of her officers, worthy of notice.

There will be troubled with Spain soon, unless, with the usual silliness of insolent intellect, she tumbles to her knees at the first exhibition of spirit on the part of the United States. Prompt atonement will doubtless now be made for the outrages upon the El Dorado and the Daniel Webster. But they will be repeated, doubtless, in the cases of other vessels. The Spanish naval commanders, rejoicing in this opportunity of displaying their hatred of the Yankees, will doubtless insist that they cannot perform their duty without firing a shot at our passing steamers, and pursuing their insulting search. They will probably, therefore, disregard Concha's frightened exhortations to greater propriety; but the next time a Spanish cruiser brings to one of our mail steamers on the high seas, it is intended that a United States vessel shall be near enough to participate in the entertainment by pointing her broadside into the Spaniard forthwith. Mark the truth of this. The instructions to McCauley will confirm what I say whenever they are made public.

Such a demonstration will make an issue not to be evaded; and we shall then learn the true character of the secret protectorate of Spain maintained by England and France. What a capital privateer fleet our Cuban filibusters would fit out in the event of a war with Spain arising out of these events.

Mr. Marcy is very backward about going into this business—so is Mr. Cushing. Messrs. Ogilvie exhibit extreme measures. But the President has acted on his own impulses, although only Mr. Davis and Mr. Dobbin warmly approve his course.

DIRECTIONS TO POSTMASTERS.—The First Assistant Postmaster General has issued the following directions to postmasters:

"Books not weighing over four pounds may be sent in the mail, prepaid, at one cent an ounce, any distance in the United States over three thousand miles, and at two cents an ounce over three thousand miles, provided they are put up without a cover or wrapper, or in a cover of paper, or in a box of paper, or in a box of wood, or in a box of metal, or in a box of any other material, so that their character may be determined without removing the wrapper. If not prepaid, the postage under three thousand miles is one cent and a half, and over three thousand miles is one cent and three cents an ounce.

"It is a violation of law to enclose or conceal a letter or other thing, (except bills and receipts for subscription,) or to make any memorandum in writing, or print any word of communication after its publication upon any newspaper, pamphlet, or magazine, or other printed matter. In all such cases letter postage should be demanded, and if the person addressed refuse to pay such letter postage, the package should be returned to the postmaster from whom office it came, to prosecute the sender for the penalty of \$5, prescribed by the 30th section of the act of 1825; and all transient printed matter should be distinctly post-marked at the mailing office.

"Postmasters are allowed one cent for the delivery of each first letter, except such as come to themselves, and two mills each on newspapers (to subscribers) not chargeable with postage. They are not allowed any commission on printed matter made free by the frank of a member of Congress.

"Daguerotypes when sent in the mail should be rated and charged with letter postage by weight."

THE MASSACHUSETTS NURSERY COMMITTEE.—According to the testimony of the Lady Superior of the Roxbury Catholic School of the Sister of Charity, the Massachusetts Legislative Committee of inspection have good cause to be heartily ashamed of their conduct at that institution, as they appear to be. Their inquiry into the facts and the proofs thus obtained show that the visiting committee acted neither as gentlemen nor Christians. Their conduct was not only unlawful and unmanly, but a violation of the principles of even common decency. The Know Nothings of Massachusetts must do better than this or they will be repudiated by their brethren in other States, as bogus members of the Order.

SUGAR PROSPECTS IN LOUISIANA.—The Louisiana papers contain gloomy accounts of the prospects for a good sugar crop in that State. The Opelousas Patriot says it is not unsafe to say that the sugar crop cannot, under the most favorable circumstances of weather and season reach another year within thirty-three per cent, of the crop of the past, and that shows at least twenty-five per cent. of a falling off from the crop of 1853. Touching the cotton and corn crops, a large pitch has been made, and with a favorable season a far better yield may be anticipated than the last year.

BUILDING AND LOAN ASSOCIATIONS.—The Muscogee Loan Association held its eight monthly meeting on Saturday evening last, and (including previous loans there were re-paid), the sum of \$4,882 was put up. \$2,000 were bid for at 50 per cent. premium, \$3,000 at 51; \$1,000 original sum thus drawing the interest upon \$10,000. The Macon Loan Association, at its last meeting, loaned money at premiums ranging from 40 to 47 per cent.—being 10 to 20 per cent. less than former premiums in that organization.

MORE COLUMBIA COUNTY GOLD.—We were shown yesterday another large lump of Georgia Gold, weighing 1540 pennyweights, from the McCornick & Leitner Gold mine in Columbia Co. It was only on the 30th of March we noticed a lump of 1775 pennyweights from the same mine. This is counting up pretty fast, and proves this mine one of the most valuable in the country. This gold is from surface reefs, and is produced by the superior machinery employed—Augusta Constitutionalist.

GREAT SNOW STORM IN APRIL.—The Rome (N. Y.) Sentinel gives an account of a great snow storm that visited that region on Monday last. The editor, who travelled in the cars from Watertown to Rome, says:

"In many places the snow was higher than the tops of the cars, a channel having been cut through just wide enough for their passage. In many places the shelving drifts had extended half over this canal, while in the bottom an accumulation of two or three feet of snow, with no room for depositing it from the scrapers, soon formed a barrier to the progress of the train, and the shovellers were again in demand."

THREE MEN KILLED.—We learn (says the Savannah Journal), from a gentleman from Emanuel county, that three men were killed in a fight in that county, on Monday week. The names of the parties killed were: Cuyler Mose, Matthew W. Williamson, and Samuel Wiley; the last named received three title balls in his body. We have not been able to learn the cause of the quarrel.

The Advertiser.

ARTHUR SIMKINS, EDITOR.

EDGEFIELD, S. C.

WEDNESDAY, APRIL 18, 1855.

EXCUSATORY.

The reader must excuse the entire absence of editorial comments in our present number. We reached home from Charleston just too late to find a place for our annotations on the trip. We shall endeavor to make up next week by a full account of all we saw and heard.

RELIGIOUS REVIVAL.

A FRIEND who has been an attendant at the Village Baptist Church during the present revival in that Church, furnishes us the following:

For the last two weeks the Rev. Dr. TEASDALE, of Washington City, has been preaching in our vicinity with great success. Fifty-one whites and ten blacks have been baptized and received into the Church, while many mourners are seeking the pardon of their sins at the foot of the Cross. God grant that this great and glorious work may be continued in our midst until every soul is saved.

We are assured that no unnecessary excitement prevails, but that the powerful reasoning and masterly eloquence of Dr. TEASDALE has convinced all of the "error of their way," and bringing them to a firm determination to try and serve the Lord. This has been a remarkable season of refreshing to all Christians. Nothing so far so far occurred to produce any unnecessary excitement, every thing has been conducted "decently and in order."

We take occasion to say in this connection that Mr. TAYLOR, who accompanies Dr. T., as Agent, to solicit assistance from the brotherhood in building up the enterprise in Washington City, has been in our Village for a fortnight past, and by his quiet and Christian-like deportment, has commanded himself to the kind regard of all with whom he has been associated.

Condensed Items.

REMEMBER that "Uncle Sam" has adopted the cash system, and no letter will be mailed unless the postage thereon is paid in advance.

By reference to our advertising columns it will be seen that Mr. FELIX C. BODIE has declined being a Candidate for Sheriff at the ensuing election.

Isaac Newton, the well-known proprietor of the Hudson River steamers, died in New York on Saturday.

The Emperor Nicholas, by his will, which was opened after his death by the present Emperor, expresses a wish that the duration of the mourning on the occasion of his death should be shortened as much as possible.

England imported 30,513,533 pounds of tobacco in 1854, from which she received a revenue of \$2,000,000.

SO LATE a spring as the present has not been known in Texas for thirty years past. Both corn and cotton have had to be replanted, on account of the bad stand from the first planting. In many instances planters have plowed up their ground entirely and replanted their entire crop. But the drought continues, and there is now scarcely moisture enough to sprout the seed. The prospect is indeed discouraging. Never before have the rivers of Texas been known to be as low as now, at this season of the year. So says the Galveston News.

GREAT FIRE.—Nearly eighteen hundred bales of cotton were destroyed by fire at Magnolia, Texas, on the night of the 19th ult., the entire loss being estimated at sixty thousand dollars, which is the largest ever sustained by fire in Texas.

A STEY FORWARD.—By law recently passed in Michigan, a married woman may receive, buy, sell, mortgage, &c., her real and personal property, without the consent of her husband, and also sue and be sued, without joining the husband in the suit in either case. So the identity of the woman as an individual is beginning to be fairly recognized.

The corner stone of a new Episcopal Church was laid by the Rt. Rev. Thomas Frederick Davis, D. D., Bishop of the Diocese of South Carolina at All Saints Waccamaw, April 24, 1855.

THE TIMES IN CALIFORNIA.—Passengers by the steamer Illinois from California gave a rather discouraging account of business matters there. Mechanics and laboring men, they say, can find but little to do in San Francisco, and the general business of the country is depressed to an extent far beyond the representations of the public journals.

IN UTAH, a collision has occurred in Salt Lake city between the U. S. troops stationed there under Col. Stepiet and the Mormons, growing out of the soldiers expressing their opinion that Young and Kimball are reckless old republicans. Some of the words were being passed, and a fight ensued in which the boys fought with fists and clubs, and the soldiers used their guns. After much trouble, the military and civil officers succeeded in stopping the riot. A portion of the militia were called out and placed in the streets on guard.

The barns and stables of Dr. C. H. Black, at his plantation in Marion District, were totally consumed by fire on the night of the 24th inst. About five hundred bushels of corn, and eight head of horses and mules were consumed. The fire is supposed to have been the work of an incendiary.

PAUL R. GEORGE, of New Hampshire, is a candidate for the United States Senate. He used to be of being the man that nominated Gen. Pierce in the Baltimore convention.

The importers and dealers in wine and spirits in New York city are to have a meeting in the Park, some day this week, to protest against legislative interference with what they claim to be their constitutional rights.

Mr. Stratton, father of the well known dwarf Tom Thumb, rendered famous by B. Rums, has become insane, and is now an inmate of the Hartford Lunatic Asylum.

The Hebrew population of Chicago seems to be quite numerous. During the recent celebration of the Feast of the Passover there, about six thousand pounds of unleavened bread were sold to them.

A New York journal states that a lady in that city has made a quarter of a million of dollars by keeping school.

It is not that little, make it not less by murmuring. If that had enough, a grain of salt would be sufficient. He that is not thankfully contented with the least favor he has received, hath made himself incapable of the least favor he can receive.

The Tallahassee Floridian of the 7th inst., says: "A sale of land known as the 'Harris Hammock,' was made on the 24th inst. The tract was made last Monday, under execution. The tract contained 2,132 acres, and was sold in a body at \$21.06 per acre to Gen. Wm. Bailey. This is the largest price that has been for land in Florida in many years."

THE WHEAT CROP.—The wheat looks much better than we supposed, and if no disaster befalls it from this time we may expect a fine crop. Corn is scarce, and a good wheat crop will save the country. The oats look very sorry, and the main which we have recently had, and the warm weather, may bring them out.—Greenville Patriot.

ARRIVAL OF THE STEAMER AMERICA.

LATER FROM EUROPE.

COLUMBIA, April 13.

The steamer America has arrived at Halifax. LIVERPOOL MARKET.—Cotton was firm and unchanged, the market showed buoyant. Holders are offering freely. Sales of week \$2,500 bales, speculators buying 11,000 and exporters 5,000 bales. Fair Orleans is quoted at 5-3-4 Midding 5-3-16; Fair Orleans 5-1-2; Midding 5-1-2. Breadstuffs are dull and lower, except Corn. Canal Flour 38. Ohio 42. Corn 42. Money easier. Consols 93 1-3.

The Vienna Conference had experienced serious difficulty upon the third point, although the woman and the boy, saying that they bought them fifty of the Government of Carolina, who sold them for slaves. And they being very good friends and neighbors, and all under the same King, I must therefore desire you to deliver the said woman and boy to the bearer hereof, Silvester, who will carefully carry them to New Castle, and there put them on board of a vessel bound for the district to which they belong, and by doing, you will greatly oblige your very good friend and brother,

WM. PENN.

A NEW INVENTION.—Capt. Whitfield Walker of our town, has shown us a hoe differing from any we have ever seen, and pronounced it a most capital improvement on the hoe now in use. The said hoe is the invention of Capt. Walker, manufactured by his order by the "American Hoe Company," and called by the "Planters Cotton Thinner." The improvement consists, in narrowing the old hoe from within about an inch and a half of the edge, in a curved line on either side, gradually diminishing it to the width of the eye. We think it a capital invention. Captain Walker informs us that he has, or will apply for a patent; and that he has already received a number of orders from planters for the next crop.—Newbury News Mirror.

THE ERICSSON EXPERIMENT.—A New York correspondent of the Boston Journal gives public notice of this experiment in the following words: "The experiment is at end. The invention is conceded to be a failure, and poor Ericsson is a ruined man. He has spent all his fortune in building his caloric ship, and in the experiments he has made on the vessel. He has done more, he has spent all his life's fortune, which is great, and he is beggared. But the worst of all is, that it has led to such recrimination and alienation that they have separated, never to be united again, perhaps."

WAR'S DOINGS.—The dashing 93 Highlanders, the pride of the English army, left Constantinople eight hundred strong, and after their arrival in the Crimea received a reinforcement of one hundred and fifty men. This gallant regiment has recently returned to Constantinople reduced to fourteen men and five officers, still bearing with them their glorious and unsullied banner.

HORRIBLE MASSACRE AND BURNING OF A BRITISH SHIP.—Information has been received of a terrible occurrence on board of the British ship, the master of which (Captain Candy) with his wife, chief mate and others, have been massacred by the crew, who afterwards set fire to the vessel to prevent detection. The Berenice sailed from Shanghai on the 15th July, 1853, with a cargo of tea for Sydney. Her crew, taken from different parts of the Netherlands Indies, who, thinking there was much gold on board, conspired to take the vessel. The captain, mate and three men were killed at the outset; the captain's wife dragged from between decks, where she had flown, and thrown overboard. A French passenger by a request to substitute the crew of the Berenice and Ambryona were among the crew. All the money that the wretches got consisted of one hundred florins and fifty Spanish dollars, which they divided among themselves, and it was agreed among them to sail for Taubau, there to abandon the vessel after having set fire to it. The ship sailing Tagal, which was taken for Taubau, was set on fire, and they took to the boats. Several were left behind and murdered by the crew. Finding this a mistake on gaining the heights of Tagal, they were compelled to get rid of most of the plunder by throwing it overboard. The authorities, however, caused their arrest. Some of them confessed; four of the ringleaders were executed, and five others sentenced to twenty years banishment.

AN OPINION EXTER CURED.—The particulars of a case are given in the Medical Examiner. It is that of a physician, of Ohio, who had habitually used opium for six years as a stimulant. From the pleasant hallucinations and hopeful feelings experienced by the patient, he was cured by the use of the opium, and using the enormous quantity of from fifteen to eighteen grains of the sulphate of morphia in twenty-four hours. A number of physicians of celebrity were consulted, who all suggested a recourse to substitute the opium by the use of opium, and the patient was cured. The patient was cured by the use of the opium, and using the enormous quantity of from fifteen to eighteen grains of the sulphate of morphia in twenty-four hours. A number of physicians of celebrity were consulted, who all suggested a recourse to substitute the opium by the use of opium, and the patient was cured.
